RE: Periodic Review of Camas Shoreline Master Program

The City of Camas is undertaking a periodic review of its Shoreline Master Program (SMP), as required by the Washington State Shoreline Management Act (SMA), RCW 90.58.080(4). The city’s current plan was amended in its entirety in 2012, with limited amendments adopted in 2009 and 2015.

The state requires each SMP be reviewed and revised, if needed, on an eight-year schedule. The review ensures the SMP stays current with changes in laws and rules, remains consistent with other City plans and regulations, and is responsive to changed circumstances, new information and improved data.

In order to encourage early and continuous public participation throughout the process of reviewing the SMP, the city has a webpage that will host information on the project to include document drafts, meeting schedules, and a Public Participation Plan. The “Shoreline Management Program” page can be found on Planning Division’s website at: <http://www.cityofcamas.us/planning/planningenvironmentalshorelinemaster>

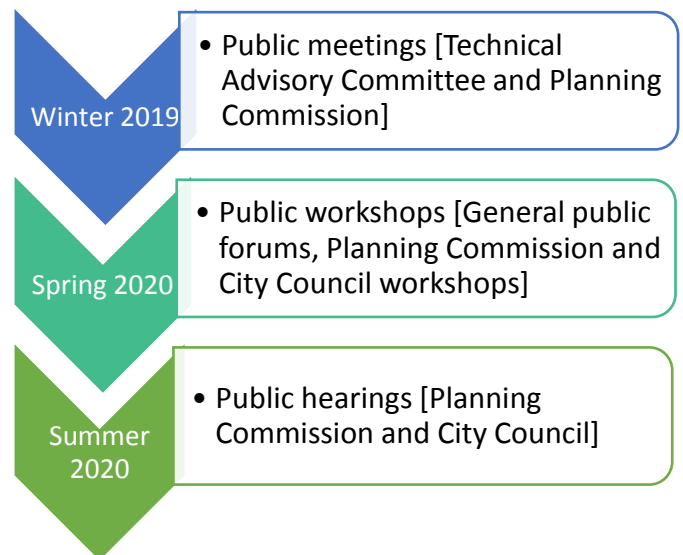

**GRANT:**

The city was offered a grant from the Department of Ecology to support the periodic review project. The grant amount of \$22,400 does not need to be matched. The expiration of the grant agreement is June 30, 2021.

The bulk of the grant funding will allow the city to perform more robust public participation and outreach. It is anticipated that the city will hire a public relations firm who will create an interconnected communication plan to ensure a seamless feedback loop between the public, shoreline property owners, and the city. At a minimum they will be responsible for creating informational flyers and postcards for distribution throughout key phases of the project.

**PROJECT TIMELINE:**

The proposed timeline of the periodic review will begin this winter with initial meetings being held with a Shoreline Technical Advisory Committee. Intermediate drafts will be reviewed and discussed at a series of public workshops throughout the spring, and a final package of proposed amendments will be brought forward for public hearings at the end of the summer of 2020.

**ACTION ITEMS:**

**Agreement #SEASMP-1921-Camas-00003** has also been placed on the November 4, 2019 Consent Agenda for Council's consideration. Staff requests Council's support of the Public Participation Plan.

### a) For Cause

ECOLOGY may terminate for cause this Agreement with a seven (7) calendar days prior written notification to the RECIPIENT, at the sole discretion of ECOLOGY, for failing to perform an Agreement requirement or for a material breach of any term or condition. If this Agreement is so terminated, the parties shall be liable only for performance rendered or costs incurred in accordance with the terms of this Agreement prior to the effective date of termination.

ECOLOGY reserves the right to terminate this Agreement if RECIPIENT fails to commence work on the project funded within four (4) months after the effective date of this Agreement, or by any date mutually agreed upon in writing for commencement of work, or the time period defined within the Scope of Work.

If this Agreement is so terminated, the parties shall be liable only for performance rendered or costs incurred in accordance with the terms of this Agreement prior to the effective date of termination.

Non-Allocation of Funds. ECOLOGY's ability to make payments is contingent on availability of funding. In the event funding from state, federal or other sources is withdrawn, reduced, or limited in any way after the effective date and prior to the completion or expiration date of this Agreement, ECOLOGY, at its sole discretion, may elect to terminate the Agreement, in whole or part, or renegotiate the Agreement, subject to new funding limitations or conditions. ECOLOGY may also elect to suspend performance of the Agreement until ECOLOGY determines the funding insufficiency is resolved. ECOLOGY may exercise any of these options with no notification or restrictions, although ECOLOGY will make a reasonable attempt to provide notice.

In the event of termination or suspension, ECOLOGY will reimburse eligible costs incurred by the RECIPIENT through the effective date of termination or suspension. Reimbursed costs must be agreed to by ECOLOGY and the RECIPIENT. In no event shall ECOLOGY's reimbursement exceed ECOLOGY's total responsibility under the agreement and any amendments. ## Camas Shoreline Master Program: Periodic Review Public Participation Plan

### Introduction

The City of Camas is undertaking a periodic review of its Shoreline Master Program (SMP), as required by the Washington State Shoreline Management Act (SMA), RCW 90.58.080(4). The SMA requires each SMP be reviewed and revised, if needed, on an eight-year schedule established by the Legislature. The review ensures the SMP stays current with changes in laws and rules, remains consistent with other City plans and regulations, and is responsive to changed circumstances, new information and improved data.

A Public Participation Plan is required to describe how the city will encourage early and continuous public participation throughout the process of reviewing the SMP.

This Public Participation Plan describes the steps that the city will take to provide opportunities for public engagement and public comment, as well as the city contact information and web addresses. This plan is in addition to any other minimum requirements for public participation required by Camas Municipal Code (“CMC”) [Section 18.55.320 – Type IV Legislative Process](#). This plan is a working document and will be adjusted as needed to provide for the greatest and broadest public participation.

### 1.0 Public Participation Goals

- Provide interested parties with timely information, an understanding of the process, and multiple opportunities to review and comment on proposed amendments to the SMP.
- Actively solicit information from citizens, property owners and stakeholders about their concerns, questions and priorities for the Periodic Review process.
- Encourage interested parties to informally review and comment on proposed changes to the SMP throughout the process and provide those comments to decision makers.
- Provide forums for formal public input at project milestones prior to decision-making by local officials.
- Consult and consider recommendations from neighboring jurisdictions, federal and state agencies, and Native American tribes.

### 2.0 Public Participation Opportunities

Camas is committed to providing multiple opportunities for public participation throughout the process. The city will use a variety of communication tools to inform the public and encourage their participation, including the following:

#### 2.1 Website

The city’s Planning Division website will include information on a “Shoreline Master Program” page (<http://www.cityofcamas.us/planning/>) where interested parties can access status updates, draft documents, official notices, minutes and other project information. The webpage will be the primary repository of all information related to the Periodic Review process. The page will include who to contact for more information and an email link for questions and comments.

## DRAFT

### 2.2 Technical Advisory Committee

The SMP review will begin with the Technical Advisory Committee (TAC). Citizen members of this committee were selected based on their experience with shoreline permits. It is anticipated that the TAC will provide detailed review and comments that will frame subsequent staff work. The public will be invited to interact and provide comments during these meetings. Comments received during the meetings will be posted on the Periodic Review webpage.

### 2.3 Notice mailing list

An email list of interested parties will be created, advertised and maintained by the city. The list will be used to notify interested parties regarding Periodic Review progress and participation opportunities. Interested parties will be added to the email list by contacting the Planning Department.

### 2.4 Comment

Interested parties will be encouraged to provide comments to Camas by letter or email throughout the entire update. All comments will be forwarded to the City Council and Planning Commission. The Periodic Review webpage will be the central repository for information under consideration. Documents will be available for review at the Camas Planning Department, and copies will be provided at the established copying cost.

### 2.5 Planning Commission and City Council

The city's decision makers will provide detailed review and recommendations during at least one workshop session preceding the public hearing. Interested parties are encouraged to attend and provide comments during public workshop deliberations and public hearings.

### 2.6 News media

The Camas-Post Record will be kept up-to-date on the Periodic Review process and receive copies of all official notices.

## 3.0 List of stakeholders

Camas will engage the following stakeholders:

- City Council
- Planning Commission
- Camas Shoreline Management Review Committee
- Local environmental/ecological firms
- Shoreline property owners (*Note: Letters will be sent to property owners inviting them to join the email list of interested parties.*)
- Adjacent jurisdictions (Clark County, Vancouver, Washougal)

## 4.0 Public Participation Timeline

The following is a **general timeline** including anticipated public participation opportunities. The city will coordinate with the Department of Ecology throughout the process. A detailed timeline will be posted on the city's webpage.

## 5.0 Public Comment Periods and Hearings

The Planning Commission will conduct a public hearing to solicit input on the Periodic Review. The City Council will hold a public hearing before final adoption.

The city will coordinate with the Department of Ecology on public notification of comment periods and hearings to take advantage of Ecology's optional SMP amendment process that allows for a combined state-local comment period (WAC 173-26-104).

Public notice of all hearings will state who is holding the comment period and hearing, the date and time, and the location of the public hearing. Notices will be published at city hall, Camas Library, the city's website, and in the legal section of the Camas Post Record. A notice will be sent to the email list (2.3, above) and the Department of Ecology.

### Lacamas Creek Sanitary Sewer Pump Station Improvements Project Construction Services Contract

Staff Contact	Phone	Email
James Carothers, Engineering Manager	360.817.7230	<a href="mailto:jcarothers@cityofcamas.us">jcarothers@cityofcamas.us</a>

**PURPOSE:**

Council awarded the bid for this project on the October 18, 2019 Council Consent Agenda. The scope of work for this contract with Wallis Engineering, Inc. is for assistance with construction services including engineering, survey staking, environmental permit compliance and various documentation and monitoring requirements. The proposed amount for these services is \$284,553. This scope is identified as Phase III: Construction services in the Project Description. The costs associated with the bid award and this scope and budget are covered in the 2019 and 2020 budget.

Staff will place the construction services scope, budget and contract on the November 18, 2019 Consent Agenda for Council's consideration.

**TO:** Mayor and City Council  
**FROM:** James Carothers, Engineering Manager  
**DATE:** 1/11/2019  
**SUBJECT:** Lacamas Creek Sewer Pump Station Consultant Agreement for 100% Plans, Specs, permits and estimates.

### **Background**

On July 2, 2018 Council formally approved a professional services contract in the amount of \$361,189.00 with Wallis Engineering to perform engineering, initial environmental and archaeological investigations, and other related work to a level that would bring the design of the Lacamas Creek Sewer Pump Station to 30% completion. Work associated with that initial contract is nearly complete, and I am happy to report that we accomplished all tasks for about \$307,000.00, or roughly \$54,000 less than the contract amount.

It is important to note that this project requires two separate engineering and permitting contracts because of its complex environmental permitting issues and high potential for historical artifacts. The second of these two contracts is the subject of this report.

### **Current Contract and Budget Summary**

This second contract with Wallis Engineering includes all remaining work required to advance the design and permitting of this project to 100% completion. This contract amount is \$377,630.00. At the completion of this work the project is slated to be ready to bid in early 2020.

### **Budget Implications**

The current budget total (2018 through 2020 for design, permitting and construction) = \$3,200,000  
2019 Capital Budget = \$1,275,000  
Total Design and Permitting (Design Contracts 1 and 2) = \$738,819

## **PROJECT DESCRIPTION**

The existing Lacamas Creek Pump Station was constructed in 1958 and is located just east of 1642 NE 3rd Avenue in Camas, WA on the west shoreline of Lacamas Creek. The pump station is nearing its design capacity, and many of the components have reached their useful life. The City of Camas has selected the Wallis Engineering team to design and complete permitting for a new Lacamas Creek pump station, and a nearby satellite pump station at Baz Park to serve homes and businesses in the NE 3rd Loop area.

The project is divided into three phases:

- Phase I: 30% design including environmental and archeological permitting. (WE#1460A)
- Phase II: Land use permitting, preparation of contract documents, and bidding (WE#1460B)
- Phase III: Construction services (WE#1460B)

Phases I and II have been completed. This supplemental agreement is for Phase III, Construction Services.

## Staff Report

November 4, 2019 Council Workshop Meeting

Staff Contact	Phone	Email
Sam Adams, Utilities Manager	360.817.1563	sadams@cityofcamas.us

**INTRODUCTION/PURPOSE/SUMMARY:** The motor control system at Well 6 is obsolete and was identified in last year's condition assessment as in need of immediate replacement. In March 2019, the City Council approved a contract with S&B, Inc. for approximately \$77,000 to upgrade the motor control system. However, the cost of the electrical needs to complete the installation was not included in that contract. Prestige Electric has submitted a quote for services to provide electrical work for installation of the new equipment. This project was included in the 2019-2020 budget.

**BUDGET IMPACT:** Total cost of \$12,260 to complete the electrical work for the project. The Water/Sewer funds were budgeted to complete this work in 2019.

**RECOMMENDATION:** Staff recommends this item be placed on the November 18, 2019 Consent Agenda for Council's consideration.

Oct. 28, 2019

City of Camas Well #6 Electrical Renovation

I have looked at the job and feel that it should cost \$10,260.00 for labor and \$2000.00 for materials. After talking with Randy at S&B the plan is to reuse the Service wire and feeder wire to the well so I have not added this in. In the upgrade we will pick up the existing fan, heater, plugs and lights. The inputs to the RTU will have to be redone as the RTU is being mounted in a new location. We will be installing a new smoke detector, flood switch, door switch and pressure transducer. The flow meter is being replaced so that will require work in the pit and well house. I think that the dollar figures are on the high side so the actual cost should be a little lower.

Thanks,

Jeff Downer

Staff Contact	Phone	Email
Jackie Caldwell	360.817.7388	<a href="mailto:jcaldwell@cityofcamas.us">jcaldwell@cityofcamas.us</a>

**INTRODUCTION/PURPOSE/SUMMARY:** The recently installed water transmission main between the Little Washougal River, near the water treatment plant at 32723 NE Lessard Road, and the intersection of NE Ireland Road and NE 312<sup>th</sup> Avenue requires wetland maintenance due to disturbance at various streams during construction. These requirements are mandated by US Army Corps of Engineers and Clark County. The maintenance period will be 5 years, from 2020 to 2024.

**BUDGET IMPACT:** The total cost is \$38,925.16 and a contingency of \$7,500.00 upon City approval. The Stormwater fund has budget available to complete this work. The expenses for each year varies due to the different levels of maintenance required in accordance to permit requirements.

**Expenditure Breakdown:**

2020 – \$14,081.16

2021 – \$4,336.00

2022 – \$6,504.00

2023 – \$3,252.00

2024 – \$3,252.00

Contingency – \$7,500.00

Total – \$38,925.16

**RE: Water Transmission Main Phase 3  
City Project # WS-709H**

Dear Ms. Jackie Caldwell,

As per your request, Olson Environmental, LLC. (OE LLC) has prepared a proposal to conduct maintenance activities for City Project #WS-709H. Mitigation activities requested by the City include site maintenance during the growing seasons of 2020-2024 (April – November) and planting in 2020. Planting will be done in the winter (January-March) of 2020. Details of work to be conducted and the costs associated with these tasks are detailed below:

**Task 1: Installation of Herbaceous Plants**

OE LLC will install 1,500 wetland emergent plugs within the wetland 1. Herbaceous plug numbers are based on the results of the 2019 monitoring report and the requirements of the approved mitigation plan. Herbaceous plugs will be acquired from a local nursery and installed prior to March 2020.

## Staff Report

November 4, 2019 Council Workshop Meeting

### Local Limits Update and Discussion

Staff Contact	Phone	Email
Sam Adams	360.817.7003	<a href="mailto:sadams@cityofcamas.us">sadams@cityofcamas.us</a>

**INTRODUCTION/PURPOSE/SUMMARY:** In June of 2017, the City hired CH2M Engineering to help with the development of Local Limits. The development of those limits is a requirement of the City's Wastewater Treatment Plant (WWTP) National Discharge Elimination System (NPDES) permit. A list of 20 pollutants of concern were included in the City's NPDES permit in which the Department of Ecology wanted the City to test for and develop limits. These limits are established for the WWTP based on the plant's ability to process the pollutants or loads and the receiving water's (Columbia River) ability to dilute them to acceptable levels when discharged.

In October of 2017, the City invited Camas industries to a kick off meeting to discuss Local Limits, the process for developing limits, and to give them the opportunity to ask questions and provide feedback.

For each quarter in 2018, the City's consultant sampled the influent and effluent at the WWTP and at specific industries within the City for the pollutants of concern and maintained a data base of results. CH2M then used that data to develop draft Technically Based Local Limits for the Camas Wastewater Treatment Plant. A copy of the executive summary from the Draft report that documents the process used to develop the Local Limits is attached for reference.

Staff presented the draft Local Limits at a Council Workshop on July 1, 2019 and per the City's NPDES permit, we submitted the draft report with proposed Local Limits to the Department of Ecology in July for review and comment. Proposed Local Limits of particular interest include Fluoride and the Best Management Practices for reducing Total Dissolved Solids and Sulfates.

Staff received some minor comments from the Department of Ecology but none of the comments changed the Local Limits as presented in the draft. Staff and our consultant would like to present the Draft Final of the Local Limits to City Council in workshop and discuss next steps in the adoption of Limits through an ordinance.

**RECOMMENDATION:** This item is for Council information only.

## Executive Summary

The United States Environmental Protection Agency (EPA) regulates compliance with the Clean Water Act (CWA), including Section 307(b) pretreatment standards. As part of this function, EPA issues National Pollutant Discharge Elimination System (NPDES) permits to publicly owned treatment works (POTWs). These permits contain provisions that require compliance with Title 40 of the *Code of Federal Regulations* Parts 403 through 471 (40 CFR 403–471) to ensure compliance with pretreatment standards by significant sources introducing pollutants subject to such standards to the POTW (cf, CWA 402(b)(8), 33 U.S.C. § 1342(b)(8) *et seq.*). Requirements to develop Technically Based Local Limits (TBLLs) are specified at 40 CFR 403.5 (c).

This TBLL evaluation has been prepared to meet NPDES requirements for the Camas Wastewater Treatment Plant (WWTP). These limits have been developed in accordance with EPA's Technical Support Document *Local Limits Development Guidance* (EPA, 2004) and in accordance with Section S6, Part F. of NPDES Permit No. WA-0020249. In response to these standards, conditions, and requirements, the local limits in Table ES-1 have been developed for the Camas WWTP.

The limits in this document are developed to be applied to the point the industries discharge into the City of Camas' collection system. The limits are protective of the Camas wastewater system, prevent treatment interference, protect the environment, and protect worker health and safety. The assumptions for fluoride are conservative and the data used to derive the fluoride limits apply to Camas only and are not intended to set standards for local limits developed for other jurisdictions.
